

# CALVING PEN

**WEIGHT:** 1080 lbs.

**DIMENSIONS:** 110" Wide x 81" High x 139" Long

Arrowquip's Calving Pen is designed to provide a safe and controlled environment for vulnerable animals. The half circle shaped pen together with the sweep gate allows the handler to guide the cow into the head gate with ease. With 7.5' access at the rear and split doors on both sides of the animal, the Calving Pen offers maximum accessibility to the cow while keeping it under control. To allow the handler to closely monitor a cow after a procedure, the self-catch head gate opens back into the pen to keep the cow contained. For animal safety, control, and accessibility during critical situations, the Calving Pen is an excellent solution.

## ENHANCED SAFETY & CONTROL

- Half circle shape eliminates risk of animals backing into a corner
- Self-catch head gate opens back into the Calving Pen, making the cow stay inside after handling
- Sweep gate allows handler to control the cow without having to get into the pen
- Straight sides on the self-catch head gate reduces stress points

## BETTER ACCESS

- 7.5' back gate provides better rear access for pulling calves
- Top and bottom split gates on both sides of the animal

## IMPROVED DESIGN

- Half floor in the chute area keeps the pen stationary
- Access doors on sweep gate feature independent locks
- Sweep gate can be chained to the back of the pen for additional security

Arrowquip was founded in 1988 by the Firth family in Australia with the mission “To influence the livestock handling industry globally through the practical application of animal science and welfare standards, and increase producer safety and profitability with innovative equipment”. This inspiration came while working cattle on their family ranch in Australia, due to the challenges they encountered with the lack of quality livestock handling solutions available to ranchers. As a forward-thinking family, they began to develop solutions to fill this gap in the market, and have been providing the high-quality livestock handling equipment producers are seeking ever since.

Arrowquip is the only manufacturer to employ a full-time team of engineers dedicated specifically to cattle handling in our industry. Every piece of equipment we develop undergoes an extensive

development period in which our R&D Team exhausts every possible avenue to make our equipment the best it can be for the handler to work their livestock. As a result, our equipment is recognized worldwide as the most innovative and thoughtfully designed livestock equipment in the market today.

In the last 30 years, Arrowquip has become a world-renowned manufacturer of cattle handling solutions known for their innovative designs, technological advancements, investment in animal science, and forward-thinking equipment. Our years of research, equipment development process, extensive testing periods, and the refusal to settle for ‘good enough’ have set a new precedent within the livestock handling industry.
